 Available Separately.

Belt Grinder/Linisher
 75mm (w) x 2000mm Belt.
 3Kw Motor (BG75)

Dust Collector & Spare Belts
 Available Separately.

The BELT GRINDER / LINISHER (BG150) has a 150mm wide x 2 metre long belt and is predominantly used for grinding castings clean, or any metal surface which requires burrs to be removed. The Grinder has a long lasting urethane drive and idler wheels. The drive wheel has a tracking and tensioning system that increases the life of the belt and the machine. The top guard opens to allow for a large flat grinding surface. The Grinder is designed to pivot allowing the desired angle to be achieved for the operation required.

We also supply replacement belts and dust collectors.

SPECIFICATIONS									
Model	Belt Size	Contact Wheel	Length	Width	Height	Weight	Belt Speed	Motor	Electrics
