Shrinker & Stretcher  
 On a Stand  
 25mm Throat  
 (SSF25)

Deep Throat  
 Shrinker/Stretcher  
 208mm Throat  
 (SS208)

SHRINKER / STRETCHERS are used to make radius curves in sheet metal without cutting, welding, heating or hammering. The Shrinker contracts sheet metal for inside curves and the Stretcher expands sheet metal for outside curves. Predominantly used for body panels of cars and aeroplanes etc; though also utilised in many other areas. The standard Shrinker/Stretchers all have jaws which are quick and easy to change or alternatively we can offer the double unit housing both a Shrinker and Stretcher individually.

SPECIFICATIONS						
Model	Throat	Max. Thickness	Length	Width	Height	Weight
SSF25	25mm	1.2mm	520mm	520mm	1300mm	25Kg
